

sci paint

Select Coat, is a highly reflective paint with substantial insulating capacity.

Because Select Coat can retain considerably more heat in buildings and reflect up to 90% of the sun's energy, it is the perfect weapon to battle the fatal effects of excessive energy consumption.

Not only does Select Coat save energy, but it also saves building owners money on heating and air conditioning.

The Company sets the bar for innovative energy solutions. Many people think you have to sacrifice convenience to conserve energy, but Select Coat benefits the environment while creating value and comfort for the consumer.

MISSION:

To develop energy-saving technologies, supporting a thriving company through steady revenue while providing a meaningful service to the global market.
